Re: Market Withdrawal of all COVID-19 KP. 2 Vaccine Formulations

The Ontario Ministry of Health is directing all custodians of Pfizer COVID-19 KP.2 vaccine to immediately quarantine and destroy the remaining supply of viable KP.2 vaccine and report their revised inventory on COVaxON by **September 2, 2025**.

Follow your local practices and processes for the destruction of these vaccines. For sites that do not have this product on hand, no action is required.

As a result of this regulatory withdrawal of Pfizer KP.2 product and the expiration of the Moderna product, there will be no supply of COVID-19 vaccines until the new formulation of LP.8.1 is released in the Fall of 2025.

Please ensure you have documented all COVID-19 vaccine doses administered in COVaxON as soon as possible.

For questions about this information please contact your local public health office:
